Recover lost iOS data

Run EaseUS MobiSaver and follow the steps below to recover your valuable data:

- Option 1: Recover Data from iOS Device
- Option 2: Recover Data from iTunes Backup
- Option 3: Recover Data from iCloud Backup

Option 1: Recover Data from iOS Device

Step 1. Connect Device to PC and Select Recovery Mode

Run EaseUS MobiSaver and connect your iOS device to the computer. Soon you will see the three recovery modes the software offers in its main window. Choose "**Recover from iOS Device**" mode and click "**Scan**" button on the right side.

Step 2. Scan the Device to Find Lost Data

Finish step 1, EaseUS MobiSaver will automatically scan your iOS device to find out and analyze all the existing and deleted files. The length of the time spend in scanning depends on the number of the file you stored on your device. So if there are lots of data on your device, please wait patiently till the software finish the scanning task. You can also click "**Stop**" button to cancel the scanning task and try to find lost data from current scan result.

Step 3. Preview and Recover The Lost Data

After scanning, all the recoverable files on the iOS device found by EaseUS MobiSaver will be displayed on the left side in well-organized categories. You can easily find and preview the exact type of file by clicking the correct category. Finally, you can select out all the iOS data you desire and get them back with one click on "**Recover**" button. Here you need to specify a folder to save the recovered files on your computer.

Option 2: Recover Data from iTunes Backup

Step 1. Select iTunes Backup to Recover

Run EaseUS MobiSaver and choose "**Recover from iTunes Backup**" mode, then select the iTunes backup file you need and click "**Scan**" button on the right side.

Step 2. Scan the iTunes Backup to Find Lost Data

EaseUS MobiSaver will automatically scan the iTunes backup to find out and analyze all the existing and deleted files. The length of the time spend in scanning depends on the number of the file you stored in the backup file. If there are lots of data in the backup, please wait patiently till the software finish the scanning task. You can also click "**Stop**" button to cancel the scanning task and try to find lost data from current scan result.

Step 3. Preview and Recover The Lost Data

After scanning, all the recoverable files on the iTunes backup found by EaseUS MobiSaver will be displayed on the left side in well-organized categories. You can easily find and preview the exact type of file by clicking the correct category. Finally, you can select out all the data you desire and get them back with one click on "**Recover**" button.

Option 3: Recover Data from iCloud Backup

Step 1. Select iCloud Backup to Recover

Run EaseUS MobiSaver and choose "Recover from iCloud Backup" mode, then input the Apple account to Login the iCloud.

Select the correct backup you want and click "Scan" button on the right side.

Step 2. Scan the iCloud Backup to Find Lost Data

EaseUS MobiSaver will automatically download the iCloud backup file from the iCloud server, then scan the iCloud backup to find out and analyze all the existing

and deleted files. You can also click **"Stop"** button to cancel the scanning task and try to find lost data from current scan result.

Step 3. Preview and Recover The Lost Data

After scanning, all the recoverable files on the iTunes backup found by EaseUS MobiSaver will be displayed on the left side in well-organized categories. You can easily find and preview the exact type of file by clicking the correct category. Finally, you can select out all the data you desire and get them back with one click on **"Recover"** button.
