

New Update: EaseUS Todo Backup 6.0 brings a big enhancement on Virtualization Environment Support

NEW YORK CITY, N.Y., May 28, 2013 (SEND2PRESS NEWSWIRE) -- EaseUS Software, as an innovative software developer for providing cost-effective solutions for storage management and data protection, today releases version 6.0 of Todo Backup with much more advanced functions and easier user experience.

This time EaseUS Todo Backup introduces P2V copy and P2V recovery functions to those who often use a virtual environment. With these two powerful functions, computer users can easily migrate physical hard drive (including OS) to a virtual machine, making data migration so simple and easy. Furthermore, you won't be troubled by finding a way to recover single or multiple files from disk/partition backup images instead of performing a complete recovery. Now EaseUS Todo Backup allows you to recover individual files from a disk/partition backup image to save your time and disk space. Backup and recovery becomes so simple and easy with EaseUS data backup products.

As a cost-effective, yet complete backup solution, EaseUS Todo Backup also is the preferred choice of individuals, SMBs and enterprises. Continuous improvements show that EaseUS software is the most reliable data backup solution. Now being a world-famous backup software with millions of users, EaseUS Todo Backup is extremely remarkable in its field and will embrace a bright future.
