

Rocky Mountain RAM chooses EaseUS' Home Backup Solution for Its Customers

NEW YORK CITY, N.Y., Aug. 2, 2012 (SEND2PRESS NEWSWIRE) -- Disaster recovery and data protection software developer EaseUS Software Group, is very pleased to be chosen by Rocky Mountain RAM to offer their customers a reliable home backup solution. As a distributor of computer memory, USB flash drives, hard drives and hardware upgrades for all major brands of computers, workstations, printers and routers, Rocky Mountain RAM serves federal and state government, educational institutions and private sector industries.

EaseUS protects laptops, workstations and servers with strong backup technology for locally attached storage and networks. It also allows you to store your backups anywhere you want and ensures that your information remains safe. The reason that drives Rocky Mountain RAM to partner with EaseUS is because of its ease-of-use, yet professional backup solution for home users.

"We planned to provide an affordable - but also a reliable - backup tool for college students. Then we find EaseUS with an awesome backup utility and that is exactly what we are looking for," said Lisa Schaeffer, marketing manager in Rocky Mountain RAM.

EaseUS continually works hard to improve upon what they have built and deliver premium data protection products. Its friendly design empowers users with little IT-knowledge to control all backup and restore processes locally as well as remotely via the internet. Cooperating with EaseUS Software is a win-win opportunity. Detailed information for cooperation: <http://www.easeus.com/technologies/>
