NEW YORK CITY, N.Y., Sept. 13, 2012 (SEND2PRESS NEWSWIRE) — Microsoft® Windows 8 is slated for general availability on October 26, 2012. This time significant changes have been brought to the operating system's graphical user interface and platform; which is applied to personal computers, including home and business desktops, laptops, tablets, and home theater PCs, says EaseUS® Software.

New features in Windows 8 include a new interface design incorporating a new design language used by other Microsoft products, a new Start screen to replace the Start menu used by previous versions of Windows, a new online store that can be used to obtain new applications, along with a new platform for apps that can provide what developers described as a “fast and fluid” experience with emphasis on touchscreen input.

Want to try Microsoft's next operating system, Windows 8, without losing your Windows 7 system? You don't have to buy a new laptop or PC to get Windows 8. Windows XP, Vista and 7 can be upgraded to Windows 8 or you can even choose to make a “dual-booting” set-up; with the ability to boot between Windows 8 and your existing Windows installations.

EaseUS Partition Master, designed to be primarily an alternative to Partition Magic, can create, delete, and format partitions, and allow you to move and resize partitions on MBR and GUID partition table (GPT) disk under Windows 2000/XP/Vista/Windows 7 SP1/Windows 8 32 bit and 64 bit system. This partition manager software is the perfect one for you to rearrange hard disk size and prepare for dual-booting Windows 8 and Windows 7.
