Free version

✓ Allows Home and Personal users to transfer unlimited items.
✓ Can freely use the preview, add, delete and edit feature from Content Management.

Trial version

✓ Allows users to transfer the most 30 items every day and try it in 7 days.
✓ Can freely use the preview, add, delete and edit feature from Content Management.

How to Activate

To enjoy all features on business use, please firstly purchase MobiMover from EaseUS Store or click the Activate/Upgrade->Buy Now on MobiMover to purchase it.
Click the Enter License to enter your purchased license code if you have purchased it before, the software can be activated directly.
EaseUS MobiMover can be activated to Professional Edition or Technician Edition by different license code. The only difference between the Professional and Technician edition is license limitation, Professional Edition can be used on the most 3 computers and the Technician edition is for the most 99 computers.

**Note:**

Offline activation method is not supported. Please connect to internet to activate EaseUS MobiMover.
Preparation

How to prepare for the transfer:

Connect Device

When no iOS device is connected to the computer or the device is not correctly recognized, the following window displays.

Connecting the iOS device to the computer and running the EaseUS MobiMover.

Start Apple Mobile Device Service

You will get an operation guide for starting Apple Mobile Device Service if it is not running. Please refer to the guide on MobiMover to start Apple Mobile Device Service.
Trust Computer

Please note if this is the first time that you connect the iOS device to the computer, you need to tap Trust This Computer on the device.
Once the device is connected and recognized by EaseUS MobiMover, you’ll see the device information on the right-side and the three main features of EaseUS MobiMover on the left side.
Switch iOS Device

When multiple iOS devices are connected to the computer, you can refer to the click on the droplist to select the iOS device.

You can switch the selected iOS Device only in Home page.

Switch Appearance

MobiMover provides Dark and Light appearance, please choose your favorite appearance.
Content Management

Content Management feature helps you apply a more customized management to your iOS contents.

You can easily manage your Audio, Pictures, Videos, Podcasts, Messages, Contacts, Notes, Apps and Others.

Audio include Music, Voice Memos, Playlists, Ringtones, and Audiobooks.

Pictures include Photos and Albums.
Videos include Movies, TV, and Music Videos.

Other include Books and Voice Mails.

With MobiMover, you can manage each content more effectively, including adding contents from computer to your iOS device, transferring contents from iOS device to computer, between iOS devices directly, and deleting contents. This is an main window for managing Photos.

It is same to manage other contents, such as Music, Books, Contacts, Movies, etc. You are able to use the features Add Contents, Transfer to PC, Delete and To another Phone if it is visible.

For the Contacts and Playlists, you can also use the New feature to add contact or playlist.
Data Transfer

On your computer contains your documents, personal files, music, photos, etc.

With MobiMover, you can transfer data from computer to your iOS device directly with a few clicks and the contents will be well organized in the iOS device after the transfer.

Data Transfer includes 3 transfer methods.

Phone to PC  PC to Phone  Phone to Phone

Phone to PC

If you transfer your iOS contents to computer, you will have a copy of your information to use in case your device is ever replaced, lost and damaged. MobiMover helps you transfer all iOS contents stored on device to computer.

Please refer to the following guide to make good use of MobiMover

1. Click the Phone to PC first once the Phone is recognized normally by MobiMover.

2. All categories will be listed and selected by default after clicking the Next. If your iOS device doesn’t have such type of files, an empty folder will be created and transferred. Please untick some categories or just click the Transfer to continue.
3. Once you click the **Transfer** button, the transfer process will start. The time of transferring contents varies based on the size of your contents. Please keep patient. Meanwhile, given the importance of your data, please do not disconnect your iOS device before finishing transferring process.
Once the transferring process completes, you will see Transferring Completed page. To locate data exported on computer, please click View Files. To go back to the previous page, please click Transfer More.

PC to Phone

MobiMover currently support Transfer computer contents to iOS device. You are able to transfer files or folder to iOS device via the following steps.

1. Click the PC to Phone once the Phone is recognized normally by MobiMover.
2. Click the **Select Files** to select file or folder for transferring or drag file or folder to this window directly.

You’ll get a preview of the contents in the folder that can be transferred into the iOS device.
3. Press **Transfer** button and wait for the transferring process. The time to transfer contents varies based on the size of your contents. Please keep patient. Meanwhile, given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Once the transferring process completes, you will see **Transferring Completed** Page. You can then go to the device to
Phone to Phone

New iOS device usually arrives with more powerful processing units but it can be troublesome to transfer all the data from old iOS device to the new one manually. MobiMover is able to help you transfer the data to other iOS devices with a few clicks. Please refer to the following guide to make good use of MobiMover.

Please refer to the following guide to make good use of MobiMover.

1. Click the **Phone to Phone** once the two iOS devices are recognized normally by MobiMover.
2. You’ll be given an option to select the transfer direction first then click the **Next** to continue.

3. Once you press the **Transfer** button, the transferring process will automatically start. The time to transfer contents varies based on the size of your contents. Please keep patient. Meanwhile, given the importance of your data, please do not disconnect your iOS device before finishing transferring process.
Once the transferring process completes, you will see **Transferring Completed** Page. You can then go to the device to view files. To go back to the previous page, please click **Transfer More**.
Video Downloader

Video Downloader helps you download video files to device or computer. You only need to enter or paste a download link and click Download button to start a downloading.
