Preparation

How to prepare for the transfer:

Connect device

When no iOS device is connected to the computer or the device is not correctly recognized, the following window displays.

Connecting the iOS device to the computer and running the EaseUS MobiMover, you'll see the main interface below:

Trust Computer

Please note if this is the first time that you connect the iOS device to the computer, you need to tap Trust This Computer on the device

Once the device is connected and recognized by EaseUS MobiMover, you'll see the device information on the left-side and the four main features of EaseUS MobiMover on the right side.

Switch iOS Device

When multiple iOS devices are connected to the computer, you can refer to the click on the droplist to select the iOS device.

You can switch the selected iOS Device only in Home page.

Transfer to This Device

On your computer contains your documents, personal files, music, photos, etc..

With MobiMover, you can transfer data from computer to your iOS device directly with a few clicks and the contents will be well organized in the iOS device after the transfer.

MobiMover currently support Transfer computer contents to iOS device **By folder** and **By file**.

Transfer to This Device By folder

Refer to the **Getting Started- Preparation** section to get your iOS device connected.

Press the **Transfer to This Device** button on the main window and you'll get the two options.

Click **By folder**, browse to the desired folder and press **Select Folder**

You'll get a preview of the contents in the folder that can be transferred into the iOS device

Press **Transfer** button and wait for the transferring process

The time to transfer contents varies based on the size of your contents. Please keep patient. Meanwhile, given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

i Please don't disconnect device while transferring.

Once the transferring process completes, you will see Transferring Completed Page. You can then go to the device to view files. To go back to the previous page, please click **OK, I got it**.

Transfer to This Device By file

Refer to the **Getting Started- Preparation** section to get your iOS device connected.

Press the **Transfer to This Device** button on the main window and you'll get the two options.

Click **By file**, browse to the desired folder and EaseUS MobiMover will only display the supported files. press **Open** to confirm your choice.

You'll get a preview on where you can find the file on your iOS device

Press **Add** to add more files to import and **Transfer** to confirm and start the current import process.

If the file format of music and video files are not supported by target device (iPhone/iPad), you will get the steps as below to transcode the files, and only the format *.avi, *.flv, *.mkv, *.wmv, *.rm are able to be transcoded.

Some videos need to be transcoded before transferring to play on the device. (Those videos won't be transferred if skipping.)

Transcode Skip

The time to transfer contents varies based on the size of your contents. Please keep patient. Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Preparing:Zebra.tif 100%

i Please don't disconnect device while transferring.

Once the transferring process completes, you will see Transferring Completed Page. You can then go to the device to view files. To go back to the previous page, please click **OK, I got it**.

Transfer to Other Device

New iOS device usually arrives with more powerful processing units but it can be troublesome to transfer all the data from old iOS device to the new one manually. MobiMover is able to help you transfer the data to other iOS devices with a few clicks. Please refer to the following guide to make good use of MobiMover.

Please refer to the following guide to make good use of MobiMover.

Refer to the **Getting Started- Preparation** section to get your iOS device connected.

Click the **Transfer to Other Device** button.

If no other iOS device is detected, you'll be prompted to connect another iOS device.

Make sure other iOS devices are correctly connected and recognized, you'll be given a drop-list to select your desired destination iOS device as well as the checkboxes to tick your preferred categories.

Once you press the **Transfer** button, the transferring process will automatically start.

The time to transfer contents varies based on the size of your contents. Please keep patient. Meanwhile, given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Once the transferring process completes, you will see Transferring Completed Page. You can then go to the device to view files. To go back to the previous page, please click **OK, I got it**.

Transfer to Computer

If you transfer your iOS contents to computer, you will have a copy of your information to use in case your device is ever replaced, lost and damaged. MobiMover helps you transfer all iOS contents stored on device to computer with 1-click.

Please refer to the following guide to make good use of MobiMover

Refer to the **Getting Started- Preparation** section to get your iOS device connected.

Press the **Transfer to Computer** button.

MobiMover will list all the file icons, if your iOS device doesn't have such type of files, an empty folder will be created and transferred.

Choose categories you want to transfer and select your preferred export path on computer

You can click the **Browse** button to change the destination folder on the computer.

Once you click the **Transfer** button, the transfer process will start.

The time of transferring contents varies based on the size of your contents. Please keep patient.

Meanwhile, given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Once the transferring process completes, you will see Transferring Completed page.

To locate data exported on computer, please click **View**. To go back to the previous page, please click **Back**.

Custom

Custom feature helps you apply a more customized management to your iOS contents.

In Custom feature, you can easily manage your Contacts, Messages, Notes, Calendars, Voice Mail, Books, Safari bookmark and history, Photos, Videos and Audios.

For how to use the EaseUS MobiMover tool to help manage every type of iOS contents, please kindly refer to the following sections.

Refer to the **Getting Started- Preparation** section to get your iOS device connected.

Press **Custom** button to start the management.

Contacts

With MobiMover, you can manage your contacts more effectively, including transferring contacts from iOS device to computer, between iOS devices directly, adding contacts from computer to your iOS device, transferring contacts to Contact app on your Mac directly, editing info for existing contacts, and deleting useless ones as well. Please refer to detailed guide below to make good use of EaseUS MobiMover.

Please refer to the following guide to make good use of MobiMover.

EaseUS MobiMover will automatically start the loading process of your contacts on the iOS device when you enter the Custom function.

Contacts can only be managed when then iCloud sync of Contacts is off on the selected iOS device. Otherwise, you would be prompted to turn off the iCloud sync to enable this function.

To turn off your iCloud, open settings on your device, go to iCloud and turn off Contacts. Once the iCloud is off, click the **Refresh** button and the Contacts content on the device will display.

MobiMover displays all your contacts on the selected device in a list.

You can press the  button shown when your mouse hovers above the item to view the detailed information or the  button to delete the Contact.

You can also Transfer Contacts from computer to the iOS device, transfer Contacts to other device, transfer Contacts to computer, edit Contacts, add Contacts and delete Contacts in a batch using following methods.

Transfer Contacts to This Device

Press the  button on the screen and you'll be given a window to select a .html file to import the Contacts.

EaseUS MobiMover only supports the .html file formerly generated by MobiMover when transferring contacts to computer.

Browse to locate the .html file and press **Open**.

The import process will automatically start and the time to transfer contents varies based on the size of your contents. Please keep patient. Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

When the Import completes, you can go to your iOS device Contacts application to view the imported Contacts.

Transfer Contacts to other device

Select the Contacts items you want to transfer to other iOS device by ticking the checkbox in front of it.

Press the  button and select your desired iOS device if no other iOS device is detected, you'll be prompted to connect another iOS device.

Make sure other iOS devices are correctly connected and recognized, you'll be given a droplist to select the desired destination.

Once the destination iOS device is selected, the Contacts transfer process will automatically start.

Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

When the Contacts transfer completes, you'll be able to view the transferred Contacts on the destination iOS device.

Transfer Contacts to computer

Select the Contacts items you want to transfer to the computer by ticking the checkbox in front of it.

Press the  button and select the destination folder on the computer to save the Contacts.

Once the destination folder is selected, the Contacts transfer process will automatically start.

Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Once the transferring process completes, you will see Transferring Completed page.

To locate data exported on computer, please click **View**. To go back to the previous page, please click **Back**.

Add Contacts

Press  button and you'll be given a window to fill in the Contacts information you'd like to add to this iOS device.

Fill in the information and you can use  to add one more entry or use  to remove one.

The screenshot displays a contact editing window with the following fields and content:

- Profile:** A circular placeholder for a photo with the text "Add photo" and icons for editing and deleting.
- First Name:** Text input field containing "Jason".
- Last Name:** Empty text input field.
- Company:** Empty text input field.
- Phone Number:** A section with a green "+" icon. It contains a dropdown menu set to "Home" and a text input field with the number "15896745887". A red "-" icon is on the right.
- Email:** A section with a green "+" icon and an empty text input field.
- Note:** A text area containing the text "Boy Friend".
- Buttons:** "Save" and "Cancel" buttons at the bottom right.

Press **Save** button and the Contact will be saved to your iOS device.
MobiMover will automatically reload your Contacts information and refresh the list.

Delete Contacts

Select the Contacts items you want to delete by ticking the checkbox in front of it.

Press the  button and you'll be prompted by a warning window to confirm the deletion.

Since this operation cannot be rolled back, please be careful when selecting items in case of loss of your valuable information.

Once you select Yes, the selected Contacts will be deleted from your iOS device.

EaseUS MobiMover will refresh and display the now existing Contacts on the iOS device.

Messages

Messages let you exchange text messages with other SMS and MMS devices using your cellular connection or Wi-Fi connection, and with other iOS devices and Mac computers using iMessage. MobiMover helps you transfer your messages/iMessages on iOS devices to computer. Please refer to the following guide to make good use of MobiMover.

Refer to the **Getting Started- Preparation** section to get your iOS device connected.

Press **Custom** button and select the **Messages** category to start the management.

You can press the  button shown when your mouse hovers above the item to view the detailed information.

You can also transfer messages from your iOS device to computer in a batch using following method.

Transfer Messages to computer

Select the Messages items you want to transfer to the computer by ticking the checkbox in front of it.

Press the  button and select the destination folder on the computer to save the Messages.

Once the destination folder is selected, the Messages transfer process will automatically start. Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Once the transferring process completes, you will see Transferring Completed page.

To locate data exported on computer, please click **View**. To go back to the previous page, please click **Back**.

Notes

With Notes you can write down important information and keep things organized, which is definitely useful and convenient. MobiMover enables you to manage your notes effectively, including transferring notes from iOS device to computer, between iOS devices directly, deleting useless notes and backup your important note to computer. Please refer to the following guide to make good use of MobiMover.

Refer to the **Getting Started- Preparation** section to get your iOS device connected.

Press **Custom** button and select the **Notes** category to start the management.

EaseUS MobiMover can only manage the Notes when then iCloud sync of Notes is off on the selected iOS device.

Otherwise, you would be prompted to turn off the iCloud sync to enable this function.

To turn off your iCloud, open settings on your device, go to iCloud and turn off Contacts.

Once the iCloud is off, click the **Refresh** button and the Notes content on the device will display.

You can press the  button shown when your mouse hovers above the item to view the detailed information

Press the  button to delete the specified Notes.

You can also Transfer Notes from computer to the iOS device, transfer Notes to other device, transfer Notes to computer, edit Notes, add Notes and delete Notes in a batch using following methods.

Transfer Notes to device

Press the  button on the screen and you'll be given a window to select a .html file to import the Notes.

EaseUS MobiMover only supports the .html file formerly generated by MobiMover when transferring Notes to computer.

Only the text content in Notes is supported by EaseUS MobiMover.

Browse to locate the .html file and press **Open**.

The import process will automatically start and the time to transfer contents varies based on the size of your contents. Please keep patient. Meanwhile, given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

When the Transfer completes, you can go to your iOS device Contacts application to view the imported **Notes**.

Transfer Notes to other device

Select the Notes items you want to transfer to other iOS device by ticking the checkbox in front of it.

Press the  button and select your desired iOS device if no other iOS device is detected, you'll be prompted to connect another iOS device.

Make sure other iOS devices are correctly connected and recognized, you'll be given a drop-list to select the desired destination.

Once the destination iOS device is selected, the Notes transfer process will automatically start. Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

When the Notes transfer completes, you'll be able to view the transferred Notes on the destination iOS device.

Please kindly note that only the text part of the Notes will be transferred.

Transfer Notes to Computer

Select the Notes items you want to transfer to the computer by ticking the checkbox in front of it.

Press the  button and select the destination folder on the computer to save the Notes.

Once the destination folder is selected, the Notes transfer process will automatically start. Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Once the transferring process completes, you will see Transferring Completed page.

To locate data exported on computer, please click **View**. To go back to the previous page, please click **Back**. EaseUS MobiMover currently only support transferring the text part of the Notes.

Add Notes

Press  button and you'll be given a window to fill in the Notes information you'd like to add to this iOS device.

Fill in the contents in the blank.

Press Save button and the Note will be saved to your iOS device.

MobiMover will automatically reload your Notes information and refresh the list.

EaseUS MobiMover currently only support text content Notes.

Delete Notes

Select the Note items you want to delete by ticking the checkbox in front of it.

Press the  button and you'll be prompted by a warning window to confirm the deletion.

Since this operation cannot be rolled back, please be careful when selecting items in case of loss of your valuable information.

Once you select Yes, the selected Notes will be deleted from your iOS device.

EaseUS MobiMover will refresh and display the now existing Notes on the iOS device.

Calendar

Nowadays, Calendar events and tasks are closely associated with your daily life. When it comes to how to manage the records in calendar, MobiMover might be your optimal choice. With MobiMover, you can easily view the Calendar events, transfer calendars from iOS device to computer and delete unwanted calendars. Please refer to the following guide to make good use of MobiMover.

Refer to the **Getting Started- Preparation** section to get your iOS device connected.
Press **Custom** button and select the **Calendar** category to start the management.

EaseUS MobiMover can only manage the Calendars when then iCloud sync of Calendars is off on the selected iOS device. Otherwise, you would be prompted to turn off the iCloud sync to enable this function.
To turn off your iCloud, open settings on your device, go to iCloud and turn off Contacts.
Once the iCloud is off, click the **Refresh** button and the Calendars content on the device will display.

You can press the  button shown when your mouse hovers above the item to view the detailed information or the  button to delete the specified Calendars.

You can also transfer Calendars to computer and delete Calendars in a batch using following methods.

Transfer Calendars to Computer

Select the Calendars items you want to transfer to the computer by ticking the checkbox in front of it.

Press the  button and select the destination folder on the computer to save the Calendars.

Once the destination folder is selected, the Calendars transfer process will automatically start. Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Once the transferring process completes, you will see Transferring Completed page.

To locate data exported on computer, please click **View**. To go back to the previous page, please click **Back**.

Delete Calendars

Select the Note items you want to delete by ticking the checkbox in front of it.

Press the  button and you'll be prompted by a warning window to confirm the deletion.

Since this operation can not be rolled back, please be careful when selecting items in case of loss of your valuable information.

Once you select Yes, the selected Calendars will be deleted from your iOS device.

EaseUS MobiMover will refresh and display the now existing Calendars on the iOS device.

Voice Mail

Transfer Voice Mail to computer

Voice Mail lets you see a list of your messages and help you get a good backup of them on your computer.

With MobiMover, you are able to get the access of these voice mails and transfer them from iOS device to computer. Please refer to the detailed guide to manage the voice mails on the iOS device.

Refer to the **Getting Started- Preparation** section to get your iOS device connected. Press **Custom** button and select the **Voice Mail** category to start the management.

MobiMover will display a list of all the Voice Mails on your device. You can transfer Voice Mail from your iOS device to computer in a batch using following method.

Select the Voice Mail items you want to transfer to the computer by ticking the checkbox in front of it.

Press the  button and select the destination folder on the computer to save the Voice Mail.

Once the destination folder is selected, the Voice Mail transfer process will automatically start. Given the importance of your data, please do not disconnect your iOS device before finishing transferring process.

Once the transferring process completes, you will see Transferring Completed page.

To locate data exported on computer, please click **View**. To go back to the previous page, please click **Back**.

Books

Reading books is an enjoyable thing. MobiMover makes it quite easy to add new books from computer to your iOS device, transfer books to computer, share books between iOS devices and even delete unwanted books. Please refer to the following guide to make good use of MobiMover.

Refer to the **Getting Started- Preparation** section to get your iOS device connected.

Press **Custom** button and select the **Books** category to start the management.

EaseUS MobiMover will start the loading process of your Books on the iOS device.

EaseUS MobiMover can help manage the .pdf format Books, .epub format Books and as well as the Purchased Books synced on this device.

You can press the  button to delete the specified Books.
