EaseUS launches the world's first iPhone data recovery freeware -

MobiSaver Free

EaseUS Software, as an innovative software developer for providing cost-effective solutions for storage management and data protection, today announces an important event by introducing the world's first and the most powerful iPhone data recovery freeware - EaseUS MobiSaver Free. It allows iPhone users to freely recover mistakenly deleted photos, videos, text messages, contacts and more.

Data loss might happen to everyone with an iPhone; photos, messages, contacts mistakenly deleted. Or your iPhone become dead because of a jailbreak fails or system update. No matter what it is, EaseUS MobiSaver Free can effectively rescue mistakenly deleted contents directly from an iPhone, iPad, or iPod Touch with different file types supported. The best part of this software is that it is totally free.

EaseUS MobiSaver Free works immediately when data loss happens; simply connect the device to the computer, launch MobiSaver Free, and all your lost data can retrieved back with a few clicks. What's more, in cases where data cannot be recovered directly, EaseUS iPhone data recovery software can also recover information from the latest iTunes backup file.

Key Features:
* Recover Pictures & videos, Message attachments, Text Messages, Call History, Contacts, Calendar, Notes, Reminders, even Safari Bookmarks and more.
* Scan and preview recoverable information from the iTunes backup file or directly from iPhone, iPad, iPod Touch.
* Scan and preview recoverable information from the iTunes backup file.
* Can recover lost information after factory re-set, failed iOS update, accidental deletion, etc.
* No tech skills are required and cause no damage to your iDevices.
* Works with iPhone 3G/3GS/4/4S/5, iPad and iPod Touch.
